

iPhone update causing voicemail issues for some Telstra users

Description

iPhone update causing voicemail issues for some Telstra users

A recent iPhone update has led to some Telstra customers experiencing issues with their voicemail inbox.

When someone tries to leave a message on that person's voicemail service, they hear a recording that says "No message can be left on this service".

If this is something you are experiencing, please visit [Telstra's page](#) for instructions on how to resolve this issue through your phone's settings.
