

Telecommunications disaster resilience innovation program

Description

Telecommunications disaster resilience innovation program

Disaster resilience projects receive funding boost

Two streams of funding as part of the Australian Government's Telecommunications Disaster Resilience Innovation (TDRI) program has seen 33 projects recognised.

The program promotes the development of new technologies to provide solutions for telecommunications disaster resilience, particularly in our regional, remote and First Nations communities. It forms part of the Australian Government's Better Connectivity Plan for Regional and Rural Australia.

18 projects received funding under the Power Resilience Round, while another 15 15 projects received funding under the Innovation Round.
