

Fixed Wireless ticks the box on cost, data allowance and speed

Description

Fixed Wireless ticks the box on cost, data allowance and speed

Who

Emma Macek

Where

Traveston, QLD

What

Fixed Wireless

The problem

For 12 years, Emma and her partner persisted with an unreliable mobile broadband connection because they were told this was the only one they could get – despite their neighbours across the road having nbn® connections. Emma wanted to work from home instead of travelling into Brisbane every day, but her slow mobile broadband connection in her rural area did not allow this.

The solution

Emma reached out to the Regional Tech Hub thanks to a recommendation from her local IT shop. We ran assessed Emma's options and needs and recommended an nbn Fixed Wireless as a solution. Now, their connection is fast, reliable, and most importantly, much more affordable.

The Regional Tech Hub was amazing and so incredibly helpful and patient with all my questions. We are the proud owners of internet that is usable for the first time in 12 years. We can't thank them enough.
