Description

. Community Connectivity Hub

Talk to us about how we can help your local community. We work closely with regional communities to raise awareness of our services and provide information and support that meet their needs.

• Supporting organisations

At the **Regional Tech Hub**, weâ??re committed to growing our network and expanding our community reach so that people in regional, rural, and remote Australia can access reliable phone and internet connectivity advice, that is independent and free. Our focus is always on people â?? helping individuals and communities build their *connectivity literacy* so they can understand, use, and fix their own connections.

We work closely with community organisations, industry partners, and government to ensure the latest information and solutions flow both ways â?? from communities to decision-makers and back again.

Through these partnerships and our one-on-one support services, weâ??ve helped thousands of Australians overcome connectivity challenges. No issue is too hard â?? weâ??re constantly exploring new and innovative approaches to keep regional Australia connected.

See some reviews of how we have helped

Best thing I ever did was finding Murray and the Regional Tech Hub! I live in an area where Iâ??ve never received good internet, despite trying everything that was available, but nothing resolved my issues. I heard about this service on the radio and signed up for a connectivity report. This report gave me a number of options, without any bias recommending any particular service. Based on receiving this report I was able to make an informed decision for my area. I cancelled my existing service and changed to the best recommendation. Iâ??ve had the new service for a month now and could not be happier. First time Iâ??ve ever had fast enough internet to even watch catchup TV. Itâ??s fantastic. Thank you Murray and team. Awesome advice.

Dubbo, NSW | Cassandra

Wow!! What a fantastic service you have provided to me! You have answered every possible question I may have and I am most impressed. Thank you again for such an outstanding service.

Kyoomba, QLD | Bronwen

Definitely provided information that I didn't already have, and hence steered me towards a solution.
