

Interactive Agriculture Tech Maps

Description

Interactive Agriculture Tech Maps

The interactive agriculture tech maps are designed to assist primary producers by presenting a general overview of where technology solutions can assist in different primary production sectors.

Maps are available for

- Horticulture
- Aquaculture
- Broadacre
- Livestock
- Forestry

To explore an interactive map, click on the purple buttons to view the technology solution. Click the cross to return to the map. The double arrow button in the corner will expand the map to be full screen.

*Note these maps do not represent the only products available/suitable for the sectors represented. We recommend speaking to trusted advisors and suppliers.

The following websites list many of the solutions currently available in the Australian market

- [AgTech Finder](#) – An independent marketplace helping Australian farmers and producers search, sort, and compare AgriTech solutions. An initiative of Food Agility CRC.
- [Farms of the Future Program](#) – A NSW DPI initiative providing training and resources on AgriTech adoption.
- [Australian Agritech Association](#) – Provides a great sector overview tool that lists many providers in Australian market.

Thank you to the following companies for assisting with images: Land Watch Australia, FarmBot, Farmdeck, OptiWeigh, Gallagher & Mait Industries.
