

iPhone update causing voicemail issues for some Telstra users

Description

iPhone update causing voicemail issues for some Telstra users

A recent iPhone update has led to some Telstra customers experiencing issues with their voicemail inbox.

When someone tries to leave a message on that personâ??s voicemail service, they hear a recording that says â??No message can be left on this serviceâ??.

If this is something you are experiencing, please visit [Telstraâ??s page](#) for instructions on how to resolve this issue through your phoneâ??s settings.
