

On Farm Connectivity Case Study: Automated and portable cattle weighing system

Description

On Farm Connectivity Case Study: Automated and portable cattle weighing system

Trudi Oxley and Paul Thomson

Katherine, NT

Automated and portable cattle weighing system

A need was identified for a way to save on costs and time in identifying current weights of stock to make decisions on sale and transportation earlier.

Using the On Farm Connectivity Program, they were able to offset the costs of integrating an automated and portable cattle weighing system into their pastoral business spanning 45,000 hectares.

“Anyone that is in our situation of thinking that something could make a good change to their business can now access that technology without investing the full amount.”

Trudi Oxley
