This is a basic guide to the options available, many components of a connection are dependent on what is available at your location & the plan you order. Prices will vary depending on provider's offer. Information correct at 15/08/24. When choosing a plan please consult your providers' **Critical Information Summary (CIS)** for terms and conditions.

	Non nbn Fibre & Cable	Wireless Internet Service Provider	What to consider when selecting a connectivity service
<b>Price (monthly fee + install costs)</b>	Varies & Install costs may apply	Varies & Install costs may apply	 <p><b>Location</b> - Understanding what technology types are available and most suitable for your location is important. The Regional Tech Hub can develop a bespoke report for your individual address.</p>  <p><b>Budget/Cost</b> - What are you willing to spend each month, do you need a backup option?</p>  <p><b>Speed</b> - Will affect how many devices can be operated simultaneously ( i.e Netflix needs 5Mbps to stream HD content). 50Mbps is the most popular speed used currently.</p>  <p><b>Usage</b> - How many people and devices in your household will be connected to the service.</p>  <p><b>Data</b> - How much data do you require monthly? Streaming videos or gaming will use high levels of data, fortunately many products offer unlimited plans.</p>  <p><b>Extra equipment</b> - Will the installation require purchasing a router or satellite equipment? If connectivity is still an issue inside your property you may require booster or mesh devices.</p>
